Setup Tips:

- The key is not to overexpose the backdrop; the light should be 1 or 2 stops darker than the light on your subject.
- Keep the placement of the subject, the lighting and the exposure consistent throughout the shoot to ensure the best final product.
- Keep your backdrop clean and free of wrinkles.
- Always test your setup.

1 UMBRELLA SETUP

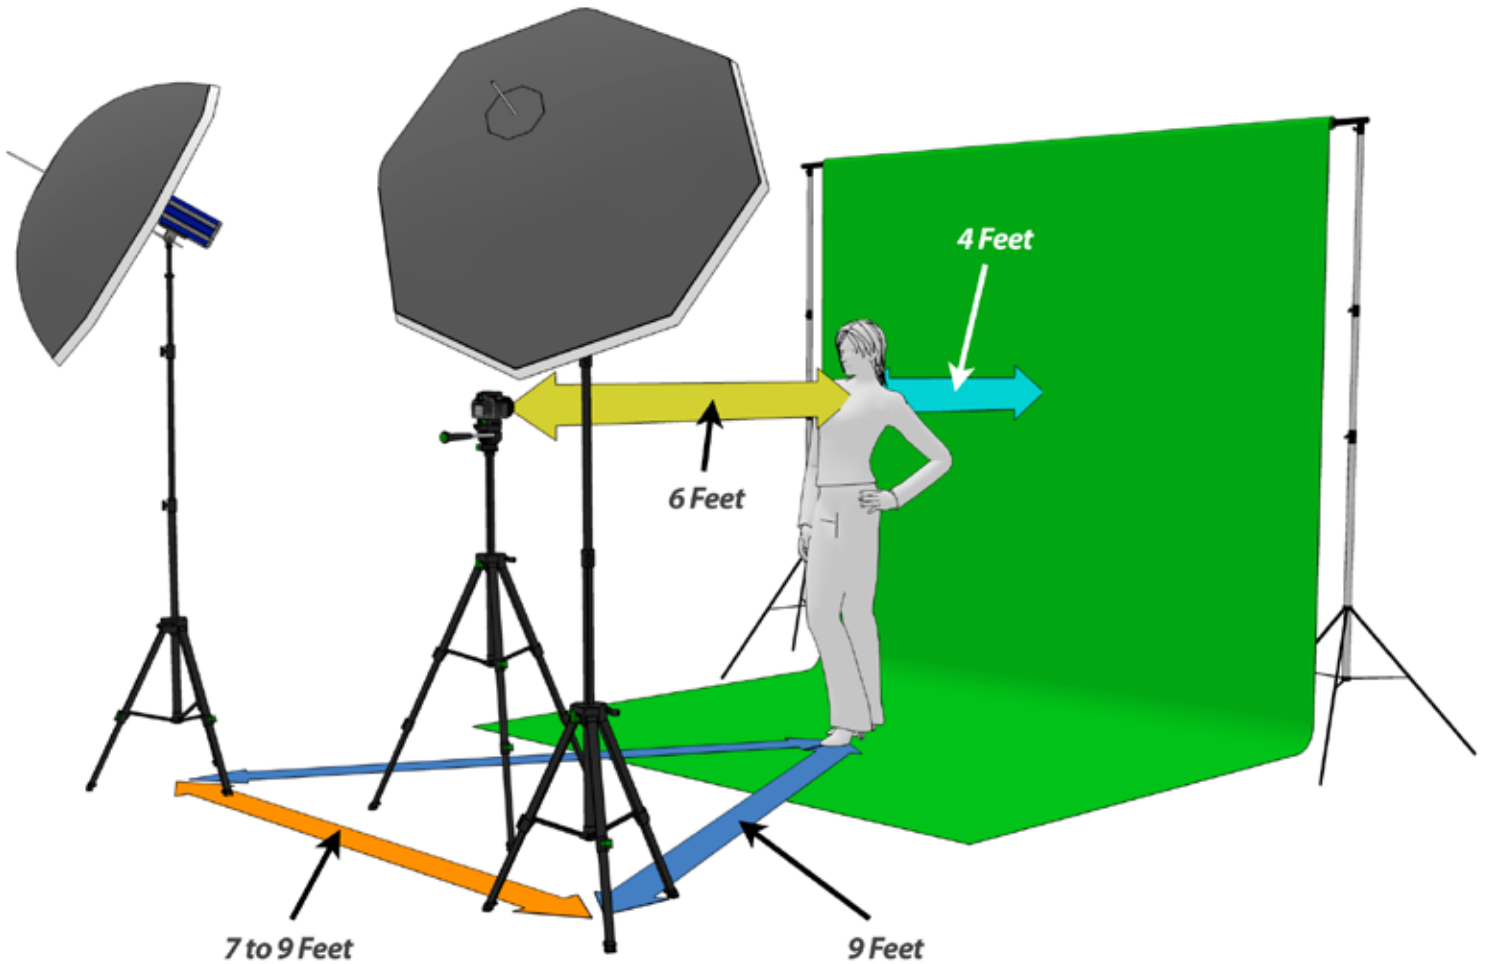

This setup is also valid for Softboxes

-  Distance from Camera to your Subject: **6 Feet**
-  Distance from Subject to the Backdrop: **4 Feet**
-  Distance from your Subject to the Umbrella: **6 Feet**
